

Sujal Koli

Pune, Maharashtra | +91 7757879653 | sujalkoli03@gmail.com | LinkedIn | GitHub

Summary

Software Development Engineer with strong foundations in Data Structures, Object-Oriented Design, and scalable backend systems. Experience building production-grade RESTful services and responsive web applications using ASP.NET Core and Angular. Proficient in Java and problem-solving with 250+ DSA problems solved. Passionate about designing efficient, maintainable, and performance-driven systems.

Skills

Languages: Java, C#, Python, C++, C

Backend: ASP.NET Core, REST APIs, Microservices Architecture

Frontend: HTML5, CSS3, JavaScript, ReactJS

Databases: MySQL, SQL Server (SSMS), MongoDB

DevOps & Tools: Git, GitHub, Maven, Postman, Docker (Basics), Linux

Testing: Unit Testing, API Testing, REST API Automation

Concepts: Data Structures, OOP, DBMS, Operating Systems, Computer Networks

Experience

Encora Innovation Labs

Software Development Engineer

Aug 2025 – Present

Pune, India

Client Project: Quest Global – RMG Platform Modernization

Tech Stack: C#, ASP.NET Core, Angular, SQL Server, REST APIs, Azure DevOps

- Designed and implemented scalable RESTful services following clean architecture and microservices principles.
- Developed modular Angular components and integrated them with backend APIs to build responsive, data-driven user interfaces.
- Optimized database queries using LINQ and indexing strategies, improving response time and reducing redundant data operations.
- Implemented robust business logic with focus on maintainability, separation of concerns, and performance.
- Participated in design discussions, code reviews, and sprint planning ensuring high code quality and engineering standards.
- Contributed to CI/CD workflows, version control practices, and production issue resolution in Agile environment.

Internal Full-Stack Engineering Training

- Built RESTful services using ASP.NET Core emphasizing layered architecture and dependency injection.
- Developed frontend modules with Angular focusing on reusable components and structured state management.
- Applied object-oriented design principles and SOLID concepts in backend service development.
- Practiced unit testing and debugging to ensure reliability and testability of services.

Projects

Airline Management System

Java, MySQL, OOP

- Designed and developed a Java-based application implementing object-oriented design patterns and modular architecture.
- Implemented efficient CRUD operations and optimized SQL queries for consistent performance.
- Applied structured exception handling and input validation ensuring system reliability.

NLP Sentiment Analysis Web Application

Python, Flask, REST APIs

- Developed REST-based application for sentiment classification with structured preprocessing pipeline.
- Designed modular backend services and API endpoints following clean coding standards.

Education

PCET's Nutan Maharashtra Institute of Engineering and Technology	2021 – 2025
B.E. Electronics and Telecommunications	CGPA: 8.77
Shri Fattechand Jain Jr. College	2021
Higher Secondary Certificate	86.67%
Vidya Niketan English Medium School	2019
Secondary School Certificate	82%

Achievements

- Solved 250+ Data Structures and Algorithms problems on LeetCode.
- Earned 5-star rating in C++ on HackerRank.
- Secured 2nd Rank in Second and Third Year of Engineering.
